DETAILED ACTION

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. In accordance with a personal conversation on September 16, 1998 and a telephone conversation on September 28, 1998 with Mr. Turner for the applicant, the following changes were agreed upon to place the case in condition for allowance:

A. Claims 12-14 and 16-18 have been canceled without prejudice.

B. In Claim 15 line 1, the phrase, "A process" has been deleted and --The process of claim 5, further comprising the step-- has been substituted therefor.

B. In Claim 15 line 3, the phrase "the low pH of a venturi scrubber used in a process according to claim 5" has been changed to --a pH of 2 to 3 in said venturi scrubber-- has been substituted therefor.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance:

Mr. Turner argued during the personal interview of September 16, 1998 that there would be no motivation from the Pipe-Cross Reactor (PCR) Technical Update Article to use a PCR to

Art Unit: 1754

treat the low analysis organic waste material of Wilson (U.S. Patent, 3,050,383), and pointed out that in the past, the PCR had only been used to treat substantially pure materials, such as the ammoniation of acids. This argument is borne out by said Article which discloses that, "this led to the development of the PCR wherein two acids are ammoniated simultaneously". The examiners agreed with Mr. Turner that it would not be obvious from said Article to use a PCR to treat the low analysis organic waste of Wilson, since there would be no motivation to do so. In this regard, the fact that two references can be combined does not necessarily mean that it would have been obvious to do so.

Mr. Turner also argued at the personal interview of September 16, 1998 that the term "relatively low analysis organic waste material" is an art-recognized term, referring to said Wilson patent. The examiners agreed that such term is reasonably definite, which is all that is required by the second paragraph of 35 USC 112. Accordingly, the objection of said term as being indefinite is withdrawn.

Support for changing "low pH" to --pH of 2 to 3-- is found on page 8, line 25 of the original specification.

Any comments considered necessary by applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
